ITL LAB: EXPERIMENT 3

NAME: Shreya Shetty

UID: 2019140059

CLASS: TE IT

BATCH: D

AIM: Create a website using web CMS

(Node Js/Angular Js/ReactJs/Flask/Django/Wordpress/Joomla etc.)

PROBLEM STATEMENT: Create a Music Website application which is a virtual showcase for everything related to a music website where user can listen to various types of music. The site has information regarding the latest songs, albums, and artists. It offers the customers, the chance to hear performances of their favorite artists or their most liked songs and make playlists of their own.

None of other music providers compare to Musicana. It is well-run, up to date, and has the greatest variety of options and features. Musicana is constantly suggesting new music for me to listen to, most of which I thoroughly enjoy because it suggests music based on what you frequently listen to. The music selection Musicana offers is massive and it is well organized. Plus, it's easy to look up bios and facts about your favorite artists, or even individual songs. The service absolutely worth the price and I

CONCLUSION:

Hence, in this experiment, I was able to design WebPages using Wordpress. I have used Wordpress Theme, Elementor and various Plugins for elements and audio and forms to achieve the desired result.
